

Project ZooPilot

IBM and Tsofen - Scale up

ZooPilot

ZooPilot

ZooPilot is a Zoom like application that we will implement its Admin part.

The Admin will be able to:

- Manage users
 - View users, delete a user, update user and create users
- View their sessions
 - View for each user all its sessions with the session participants
 - Each session has also 0 or more recordings
- View their sessions recordings
 - View the recordings of each user, allow them to record more OR to disallow more recordings

Timeline

Timeline

We will create project, with CRUD functionality

1st week we will do ERD for it

2nd week we will do schema for mongoDB

3rd week we will implement a simple CRUD functionality
